

## Unfurrow, relax and look younger

AFTER

BEFORE

WHEN you look good – you feel great.

Who can argue with that?

But finding the place and products which will suit your needs perfectly is not so certain – unless you go to Luxe Medispa, a leader in the field of non-surgical aesthetic enhancements. Luxe Medispa's state-of-the-art facility is ideally located in the Norwest Business Park, and offers wrinkle treatment, lip enhancement, acne scarring removal, hair removal and skin rejuvenation.

Plastic surgeon Kourosh Tavakol leads the team at Luxe Medispa and provides one of the most revolutionary anti-wrinkle treatments available. Dr Medispa's treatment involves the injection of a highly purified protein to specific facial muscles.

The muscles then relax and cannot be contracted thus smoothing lines and preventing new lines from forming.

The procedure consists of tiny injections in the

targeted areas, generally not taking more than 15 to 20 minutes.

A younger, more vibrant, facial appearance becomes very noticeable within a week and can last for up to three to six months.

The cost depends on the areas of the face treated and the number and depth of wrinkles to be treated.

However billing is based on paying only for the amount of protein used.

At Luxe Medispa, anti-wrinkle injections are only given by qualified medical professionals who have a detailed knowledge of muscular anatomy of the face and head.

All staff have a wealth of experience supplemented with regular training in all the latest technique, treatments and anti-wrinkle products.

**Details: Call Luxe Medispa on 1300 368 107 for an appointment or for more information.**
